

## **Title with font size bold 16, capitalize only the first word in the title, and do not exceed two lines.**

*Emily A. Jones,<sup>1</sup> Susan F. Adam,<sup>2</sup> John H. Smith<sup>1\*</sup>*

*1. School Name A, Address, City, State, Postal Code, Country*

*2. School Name B, Address, City, State, Postal Code, Country*

*\* Corresponding author email: author@school.org*

### **Abstract**

An Abstract is required for every paper; it should succinctly summarize the reason for the work, the main findings, and the conclusions of the study. It should not exceed 200 words. You are encouraged to provide an artwork (max: 6" width and 3" height) summarizing your work after abstract. Please insert your abstract on this page.

### **Keywords**

Provide 4-8 words or phrases, separated with semicolons, that help search engines find your work. They should start with very general topic and should end with very specific. such as; Chemistry; Synthesis, Catalysis, Copper, Coupling. Please insert your keywords one in each line on this page.

Keyword 1; Keyword 2; Keyword 3; Keyword 4; Keyword 5

## **Introduction**

Background information demonstrates why your research is necessary and important. Summarize literature on related work. State the goal of your research and how it differs from current literature at the end of introduction section.

## **Results and Discussion**

Summarize the results and the methods used with data from experiments. Ensure that all tables, figures and schemes are cited in the text in numerical order. Trade names should have an initial capital letter, and trademark protection should be acknowledged in the standard fashion, using the superscripted characters for trademarks and registered trademarks respectively. All measurements and data should be given in SI units where possible. Abbreviations should be used consistently throughout the text, and all nonstandard abbreviations should be defined on first usage. Authors are requested to draw attention to hazardous materials or procedures by adding the word CAUTION followed by a brief descriptive phrase and literature references if appropriate. The experimental information should be as concise as possible, while containing all the information necessary to guarantee reproducibility.

### ***Subsection Heading***

This section is an example how to create a subsection under a major heading. Graphics and tables may be pasted directly into the template and positioned, as they should appear in the final manuscript. Figures and Tables should be numbered. Insert Figure and Tables between paragraphs. The text should not run along the sides of any figure. The artwork used in Figures should be 3.5" wide or less for single column and 7" wide or less for double column.

## **Conclusion**

Provide a summary of the results of the research in concise manner.

## **Experimental Methods**

This section is optional and you may provide additional experimental details about your research, including methods, instruments, and related experimental results.

## **Acknowledgements**

Acknowledgments should be inserted at the end of the paper, before the references, not as a footnote to the title. Acknowledge any funding received or mentors, teachers, supervisors, etc.

## **References**

References and notes in the text should be indicated by superscript numerals that run consecutively through the paper and appear after any punctuation. Authors should ensure

that all references are cited in the text and vice versa. Authors are expected to check the original source reference for accuracy. References should follow the American Chemical Society guidelines (The ACS Style Guide; [accessible here](#)).

## **Authors**

This section is optional but highly recommended especially for student authors. Please provide a short bio about each author and their college and major choices (for students). Each author is limited up to 50 words.

## General guidelines:

- 1- Please read these instructions carefully and follow the suggested style.
- 2- If all contributors are from the same institution (high school) in that case no need to number each contributor.
- 3- Leave a space after corresponding author email and main text.
- 4- There is 8 pt after text spacing after each title. Please make sure to keep the template as it is.
- 5- Headings, such as Abstract, Introduction, etc, must be bold, Arial, 14 size with 8 pt after text spacing (Style 1).
- 6- The following headings must be included: Abstract, Keywords, Introduction, Results and Discussion, Conclusion, Acknowledgements, References, Authors. Other subsections can be added by following the guidelines.
- 7- If you would like to add subheadings, their title should be italicized and bold in 12 font size with 8 pts after text spacing (Style 2).
- 8- Figures and tables can be in single column or double column. Figures and tables should be located at the top or bottom of the column following their first citation in the text (unless they are equations, which appear in the flow of the text).  
**All figures, images, and formulas need to be emailed as a separate attachment saved in .png or .jpeg format.**
- 9- Table caption should be placed on top of the table (see sample):  
**Table 1.** Caption of the table (font 11, with 8 pts after text spacing), keep only first word capitalized, and end with a period.
- 10- Figure caption should be placed after the figure graph (see sample)  
**Figure 1.** Caption of the figure (font 11, with 8 pts after text spacing), keep only first word capitalized, and end with a period.

ALL research papers should be titled as follows:

**LastName\_FirstName**

For papers with multiple authors:

**LastName(1)\_LastName(2)**
